Happenings in and Around Frank

Mr. Stacey Smith spent Sunday in Pincher Creek.

T. B. Martin, of Macleod, was in town on Monday.

Rev. T. M. Murray, of Coleman, was a visitor here on Tuesday.

Mrs. J. Taylor returned to town on Monday after a stay in Macleod.

Rev. Gould, of Cowley, and Rev. W. H. Irwin, of Bellevue, were in town on Tuesday.

J. W. Tolaski went to Lethbridge on Sunday morning where he expects to stay several days.

The British steamer Wiston Hall was wrecked last Thursday off the coast of Alardeen, Scotland, and fifty three of her crew drowned.

Rev. J. C. Buchanan, of Calgary, superintendent of Missions for the Methodist church, was in town on Tuesday.

Mr. Moorhouse who has been working in Little for sometime has taken a position in the Imperial hotel, Frank.

Mr. and Mrs. Norton, who have been living in Frank for some time, moved to Creston, B.C., where they expect to make their home.

A card party was given in the public school hall here on Tuesday night by the members of the Catholic church to assist in the finances of their place of worship.

Mr. J. Harrington, who has been visiting at his home in Hamilton, Ont., during the Christmas holidays, returned to Frank last week and has taken up his work in the Union bank.

The Coleman Boy Scouts' hockey team came down to Frank on Saturday where a game was played against a team representing the Scouts here, the boys of the home team won by a score of 7-1. This score was partly owing to the fact that two of Coleman's strongest players were late in arriving and five on each side were played for a short time.

A "variety concert" was given in the Miners' hall on Monday night. J. W. Kessall, of Europe, was the entertainer and a number of friends of Martin Kubek were entertained by him on Sunday, the party lasting all that night, the "social glass" was in evidence. The celebration was in honor of their baby who was christened on Sunday.

In a one sided game of hockey on Thursday night Frank defeated Blairmore by a score of 14-2. Only for the work of Hinds, the Blairmore goal tender, it is hard to say what the score might have been. At no time during the game did the Frank players exert themselves. At the end of the first period the score stood 2-0, and at the end of the second it was 9-1 with the final score 14-2. The game throughout was clean, only four men being penalized, and they only for minor offences. J. McLeod, as referee, gave satisfaction to both teams while judge of play, being an Englishman, was somewhat of a joke as he had evidently never seen a game of hockey before and would persist in trying to put players on the fence for "shinnying" what that may be. Frank's next game is with Cowley on Friday, Jan. 28th.

What was without doubt the poorest exhibition of hockey ever seen in the Crow's Nest Pass, was played on Tuesday night in Coleman between the Frank and Coleman teams. The game from start

Married Men vs.

Calabash Club

What was by far the most interesting hockey match of the season took place on Wednesday night between the married men of Frank and the Calabash club. When a bunch of former professional players like W. J. McGowan, J. H. Windsor, R. E. Donkin, M. C. Moore and H. Murphy get on the ice there is bound to be something doing, and there certainly was something doing all through the 45 minutes of play.

In the first fifteen minutes of the game the married men landed three goals and the Calabash one.

In the second period the Calabash club got busy and owing to the good work of Taylor and Ryan they netted five goals. The married men got three making it 6-6.

At the start of the third and last period the married men clearly showed where their superior knowledge of the game counted. Moore, Murphy and Windsor making whirlwind rushes down the ice and tallying four more goals. The Calabash only got one so the final score stood 10-7. It might easily have been much more but for the stellar work of McGowan and Saville, the two goal keepers. Another game between these two teams will be played soon where the Calabash expect to win as they will be able to have Thompson on the line up. A. V. Lang as referee and Jake Whitt as judge of play certainly left nothing to be desired. The penalties they handed out were far more numerous to mention.

The coal miners' strike in England will begin on March 1 unless efforts to effect a compromise are successful. The recent ballot showed 445,801 for, and 115,221 against the strike, unless the operators consent to the demand for a minimum wage.

When given as soon as the "croupy cough" appears Chamberlain's Cough Remedy will ward off an attack of croup and prevent all danger and cause of anxiety. Thousand of mothers use it successfully. Sold by all dealers.

to finish was extremely rough the Coleman players starting the rough work and found that the Frank boys were there with the same class of stuff. After chasing the puck around the ice after the manner of a bunch of juveniles, McKay for Frank, finally landed one. Shortly after this Scott was jammed into the boards by one of the Coleman players when Higgins, taking a running jump, landed amongst Scott's face and made it necessary for him to retire for the balance of the first period, Hayfield went off to even up.

In the second period Coleman started in to even things up and Grissack and Easton managed to land one each after taking the puck through the Frank defence, who were apparently sound asleep. The game ended with the score 2-1 for Coleman and the half dozen or so of Coleman's rosters who attended the game seemed to be well satisfied. N. Murphy as referee tried hard to give satisfaction but it was almost impossible for any referee to keep in hand a game like the one above described.

Happenings in and Around Bellevue

Misses Grace and Eva Brewer, of Stavely, are visiting in town.

Rev. T. M. Murray, of Coleman, passed through the camp on Tuesday morning.

Rev. T. C. Buchanan, superintendent of Methodist Missions, visited the district on Tuesday.

The mine was closed down on Friday and Saturday of last week and on Tuesday of this week owing to the car shortage.

Rev. W. H. Irwin will preach a sermon on "The Resurrection of Christ," by special request on Sunday night next in Bellevue church.

We are pleased to see Edward Atkinson out again for practically the first time since his unfortunate accident while playing football last August.

In a recent issue in which appeared the names of the officers of the town band, we regret that the name of Philip Hart, as vice-president, was omitted.

A rather rough time occurred in one of the local bar rooms on Saturday afternoon over which several charges are pending. Some of the participants took very much the worse of the wear.

By some mysterious means three local men managed to drop into a hole near Maple Leaf on Friday night and when they discovered their whereabouts they weren't the mine. Fortunately none of them were hurt.

Among the interesting features promised for the Burns' night celebration on Thursday evening is an interesting sketch entitled "Miss Kirkland's move." It is a very touching love scene and will make a decided hit. Scotch dances and reels will also be attractive features.

Lundbreck Notes

Mrs. H. F. Breckenridge and Master Stuart have returned from the East.

The post office here has changed hands, A. C. C. Johnston, M.D., now being postmaster.

It is rumored that Mr. Burgess, of the B. & L. Co., is going to leave town for a short vacation in the U.S.

The annual meeting of trustees and ratifiers took place Saturday, January 13th at the Lundbreck school hall. There was a good attendance, nine all told. H. Lundbreck was elected trustee in place of Mr. Patton. Mr. Patton, who is now in Nova Scotia, was chairman of the school board. His three years of office came to an end in 1912.

The many friends of Mr. and Mrs. J. W. Ashdown, who were for several years residents of, and still own a fine ranch at Bellevue, but now residing at Sicamous, B.C., will be pleased to hear that they are the proud parents of a bouncing boy, born to them at the Salmon Arm hospital, B.C., on January 14th, 1912. James says the church promised to make a 200 pounder and he has commenced to put on an addition to the house before the youngster arrives home. All of us wish you congratulations, James.

Dr. de Van's Female Pills

Happenings in and Around Blairmore

L. H. Putnam went to Calgary on Wednesday and will return to town Saturday.

The Castle Square Entertainers appear at the opera house here on Thursday evening.

Phillip Viber, supervisor of Alberta branches of the Union Bank of Canada, was in town on Tuesday.

The local branch of the Band of Hope will hold a meeting in the Central Baptist church on Friday, at 7:30 p.m.

Willie, the 18-month-old child of Mr. and Mrs. H. E. Lyon, died on Friday evening last. Interment took place on Sunday.

Lots in the new townsite, Lake City, near the Crows Nest lake, are being sold and building operations will commence very shortly.

Harry Hunter got his upper lip cut by a puck while playing hockey with a number of his school boy chums on Monday afternoon.

The cement building erected recently on Victoria street, between 7th and 8th avenues, is now fully completed and ready for occupancy.

Mr. and Mrs. H. G. Ligelow returned from Calgary on Friday evening where the former had been attending the Sunday school convention.

G. M. Ponton, formerly of the West Canadian Collieries' staff of engineers but now of Edmonton, came to town on Friday. He returned north on Saturday.

G. W. Nushaw, of Dayton, Ohio, representing the C. W. Raymond Co., was in town on Saturday and visited the Brick Works with a view to installing more machinery.

Mr. Van Wie, who installed the handsome curtains and other scenery at the local opera house, was in town on Sunday. He returned to Minneapolis the following day.

The carpenters are busy just now finishing the inside of Mr. Budd's large brick building on Victoria street. Six spacious and comfortable living rooms, in the front part of the second story are ready for use.

Those who attended the opera house on Tuesday evening and listened to the Welsh Male Choir were greatly pleased with the visitors. They are the best company of male singers that have ever appeared at the local opera house.

Rev. W. T. Young, of Frank will preach in the Baptist church on Sunday morning next. Mr. Young is an interesting speaker and should have a large congregation on Sunday morning next. Mr. Pinkney will preach in the evening.

Mr. and Mrs. Jacob Smith, who have been residing in Blairmore for the past three years during which time they have made a host of friends, leave today for Erickson, Manitoba, where Mr. Smith has considerable farm property and where they will reside in future.

Rev. J. F. Hunter left on Monday for Vancouver where he will attend the Baptist convention which meets in the terminal city from Thursday to Tuesday. Besides seeing Vancouver, the reverend gentleman will visit New Westminster, Victoria and other important cities. He will return to Blairmore on Saturday of next week.

First Presbyterian church. Rev. A. S. Tod, pastor. Next Sunday services: 11 a.m. "Mine Eyes Have Seen the King" 3 p.m. Adult Bible Class: 7:30 p.m. "The Church and the Social Unrest." Monday: Young People's Guild at 8 p.m., subject "Resolved That the Referendum and Recall are yet impracticable." Affirmative, L. H. Putnam; negative, H. E. Lyon.

Editorial Notes

The warm weather indicates the near approach of spring.

A man's business is generally measured by the amount of advertising he does.

The people disagree on Tom Longboat's running ability. But all the Frank people agree that when it comes to running for civic honors, W. J. McGowan has got them all left behind.

If your business is in a run-down condition, if the rust is accumulating on the door latch, if the dust is gathering on the goods and you feel somewhat despondent, advertise in the local paper and join the progressive army.

The chinook is making a stay of long, but usual, duration around these parts, and if the warm weather continues the snow will very soon be chasing water down the hills and through dales to supply the fish with swimming pools.

In a recent issue of the Pincher Creek Echo it was stated that an over supply of gas in that establishment caused its entire staff to yield to its unpleasant effects. We always thought that the Echo emanated from a gaseous source but we never thought it was that bad.

The Trade Gazette, Calgary, takes umbrage to some remarks, made recently by a certain Calgary clergyman, agent real estate grafters. We think the reverend gentleman's remarks were timely. We find that some of the real estate men got their "corns pinched" and they are setting up an awful howl. The grafters that "hang around" Calgary should not be allowed to inflict their presence on the people of this province any longer. Those who wish to invest money in real estate would do well to investigate before buying, and when you do buy go and ask a good abstract man how to get a clear title. Many a person has bought a poor title, for there are men who will fleece even a poor washerwoman in land deals.

New Westminster hockey team defeated the Vancouver septette in the terminal city on Friday evening last. This puts the Royal City in the lead in the coast hockey association and it looks as if the Stanley cup will find a resting place on the northern banks of the Fraser river.

When buying a cough medicine for children bear in mind that Chamberlain's Cough Remedy is most effective for colds, croup and whooping cough and that it contains no harmful drugs. For sale by all dealers.

Foreman, to Albert: "Which is the longest hour of the day?"
Albert (yawning): "From 5 p.m. to 6 p.m., I think."

"A Live Conservative"

Defends His Cause

(To the Editor.)

Dear Sir,—In your issue of January 4th there appeared, from the pen of an "Old Time Conservative," an article with reference to the Coleman post office in which the writer lands the present incumbent of the office and at the same time attempts to belittle the qualifications of one whose name has been mentioned as the appointee to the position of postmaster, and also casting veiled insinuations upon what we deem the character of another gentleman whose name was mentioned in connection with the position.

The writer further states that in justice to the local Conservative party it should be stated that only three persons attended the caucus where the plot was hatched and that those three now try to hide themselves behind an outsider, and after a few further remarks, which are not pertinent to this discussion, he signs himself an "Old Time Conservative," which is a very appropriate nom de plume when one considers how very little he is in harmony with affairs pertaining to the Conservative party today in Coleman.

With reference to the statement that a plot was hatched at a caucus where only three attended and that these three are now trying to hide behind an outsider, I can only aver that such a statement is entirely at variance with the facts and is neither more nor less than the vapors of a disordered brain, too absurd to be worthy of comment.

The members of the executive who attended the alleged caucus are well known Conservatives, men who have worked hard for the party, who have the courage of their convictions and are not the type of men to try to hide behind anybody.

There was a plot hatched in Coleman, not by the Conservative executive, but by a certain clique who adopted much the same tactics as your correspondent has done, evidence of which can be produced at any time.

We challenge this "Old Time Conservative" to show wherein the parties referred to in his article have not measured up to the standard of good citizenship.

Can it be said of them that their ambition has been to feed at the public trough?

Have they ever been associated with any business that is not considered absolutely legitimate?

Were they ever at the back and call of any clique or faction?

Were they ever the authors of a miscarriage of justice at the suggestion of others?

These are questions that your correspondent would do well to ponder over, as in all probability the public will be thoroughly enlightened upon them in the near future.

Now, Mr. Editor, I am replying to one who has seen fit to conceal his identity by using an assumed name in order that he might thus cowardly attack the ability and character of two of his fellow citizens. From my experience as a pioneer of the West I would rather meet a grizzly on the open trail than come in contact with a rattlesnake in the grass or a skunk in the brush. It is up to this political sand-bagger when he next contributes an article upon this subject to come out in the open and sign his own name, when I will have great pleasure in discussing the matter to a finish over my own signature, and in the meantime hoping that I have not trampled too much on your valuable space, I subscribe myself,

A LIVE CONSERVATIVE.

Blairmore, Jan. 28th, 1912.

Referendum and Recall

The Young People's Guild gave an enjoyable social in the Mission hall on Monday evening last. Delicious edibles were freely partaken of and a programme, consisting of vocal and instrumental music, guessing contests etc., added to the enjoyment of the evening. The next meeting, which will be held on Monday evening, will take the form of a debate: "Resolved that Referendum and Recall are yet impracticable." L. H. Putnam will lead in the affirmative while the negative will be led by H. E. Lyon. Each leader will have one supporter. This subject should be of interest to a large number of our townfolk, especially the men, and will no doubt draw a good crowd.

Busy time at the Provincial House

(From our own Correspondent.)

Edmonton, Jan. 21.—The Legislature convened after the Christmas recess, on Monday, January 22nd.

The three weeks that the House was in session last year was a busy time for the members, especially for the Committees. The first month of every session is generally a busy one for the committees, as all bills require considerable amount of review before they are ready to be presented to the house. It was thought early in the session that the programme respecting private legislation would be small but the volume of legislation considered this year promises to be as large as any previous session in the history of the Province. At the present time over sixty bills are in the hands of the Clerk.

One of the most important private bills, although of great public character, is the legislation dealing with osteopaths.

Legislation is to be introduced respecting the employment of women in any place of business. The Act is supported by the labor organization of the Province and is in charge of Mr. Cross. It provides that no woman shall work more than ten hours per day, and that factories and places of business where women are employed shall supply every reasonable facility for their comfort and health while they are on the premises.

Two of the most important bills of the session are the Rural Municipality Bill and the Towns Bill. The passing of the Rural Municipality Bill marks a milestone in the social and material development of the Province. Under the constitution Alberta has the same right of local self government as is enjoyed by the other provinces of the East. The development of local autonomy in the western provinces is an interesting study. It has, on the whole, kept pace with material growth. The general powers and duties of course have been much enlarged covering the items of public health, nuisance grounds, cemeteries, hospitals, wolf bounties, prairie fires, granting aid to agricultural societies, traction engines, and enforcing the law respecting motor cars, and many other powers incident to municipal institution. The municipal power to prevent horse racing. This clause was unanimously struck out. The total debentures issued by any municipality is not to exceed five per cent of the assessed value of the land, and shall not run longer than twenty years. All buildings and improvements are exempt from taxation.

Co-ordinate with the Rural Municipality Bill Act stands the Town Act, although it does not involve such changes in the existing laws respecting towns as the former. It made that in towns, land shall be assessed at its fair actual value, exclusive of the value of buildings and improvements thereon.

Another bill that engaged the serious attention of the House, was the bill regulating motor cars. The fee set forth in the bill was three dollars for motor cycles, and five dollars for all motor vehicles. The Minister of Agriculture was in favor of raising it to twenty dollars; so was Mr. Hoodley. A compromise was made and put the registration fee at ten dollars. These bills are still before the Committee of the whole House.

The balance of the session will be distinguished by important work respecting the railway policy of the government.

The legislature is ready to grant a railway charter to anybody who will conform to the terms of the Railway Act, and will produce evidence that they mean business. "If it come, first served," was the motto laid down by the first legislature and is still adhered to.

LOTS!

The North-West Quarter of Section Nine

Adjoining The Town of Coleman

Will be subdivided at once into lots and placed on The Market.

Lots 50 by 100 feet, will be sold at from \$125 to \$200, Terms easy and suitable to Purchaser.

Acres Lots will be sold for \$300 and parcels containing five or ten acres will be sold on easy terms.

Those applying first will get their choice when survey is completed.

This QUARTER SECTION has been purchased from the Calgary and Edmonton Land Company by

JOSEPH GRAFTON
J. H. FARMER

A RARE OPPORTUNITY FOR LIVE INVESTORS

Lake City

In the name of the Western Terminal Point of the proposed Crow's Nest Pass Electric Railway and is already tapped by the Pass line of the C. P. R. with the C. N. R. has already approached to within a few score of miles and must eventually pass through this admirably located town.

Lake City

Is located by the shore of Crow's Nest Lake, only a few miles east of the provincial boundary between Alberta and British Columbia, and just north of the international line. In reality, it is at the top of Canada where the majestic Rockies tower in serene magnificence over great chasms and numerous floods, reflecting their presence on the waters of this beautiful lake. Here also are afforded the very best tasks for the daring mountain climber and for huntman who desire to outlive the quiet ways of the Rocky Mountain goat, sheep, deer or elk, which are the monarchy thereon. In close proximity are numerous timber, mineral and fuel resources, development of which is now in its initial stages. These resources include gold quartz, coal, iron and pulp wood.

Crow's Nest Lake has long been looked upon with promise as an admirable location for health and tourist resorts, and but now this promise is being realized. Plans for hotels, etc. are being arranged, as well as boat houses, and the most modern pleasure yaws will soon glide over the surface of this beautiful lake.

But a few weeks ago lots were placed on the market, and the agents have had their hands full attending to purchasers. Prices run from \$150 up. For further particulars apply to the agents:

Echoes From the Thriving Town of Coleman

Miss Ball spent Saturday and Sunday with friends at Frank.

Alex. McEgan, of Oatville, is suffering from Jack Frost's merciless Grip.

The plumbers are busy these days undoing some of Jack Frost's inconvenient work.

Last Saturday was pay day in town and upwards of \$60,000 was distributed amongst the miners.

Since pay day business has received a new impetus and everything has a most cheerful aspect.

Nurse Doherty has resigned from the staff of the Miner's hospital. She is being succeeded by Nurse Shone.

Dr. Ross has re-organized the local branch of the St. John's Ambulance association and holds frequent meetings in the council chamber.

Rev. T. M. Murray went to Passburg and Hillcrest on Monday and held an annual meeting at the former place in the evening. He returned home on Tuesday.

Several of our townfolk visited Blaimore during the past week.

and report new industries opening up and everything in a flourishing condition in our sister town to the east of us.

The council is considering the matter of installing a complete water system. The water will be taken from the McGillivray creek. The cost of completing same is estimated at \$40,000.

Angus McDonald, from McLaren's No. 4 camp, was up before Justice Morrison on Friday last charged with being drunk and disorderly. He pleaded guilty and was fined \$2 and costs.

The Sale at the Coleman Mercantile was a splendid success. All Saturday, Monday and Tuesday bargain seekers crowded the store and were well satisfied with the class of goods and the prices charged.

The many friends of H. W. Mills are pleased to see him around after his narrow escape at Carbonade on Tuesday last week. The accident was caused by a car, which was running at a high rate, striking the chief coal inspector and knocking him to the ground. His forehead was badly cut; his body badly bruised and he was given a general shaking up. It was a miracle that he did not receive fatal injuries.

Blaimore Hotel

D. C. DRAIN, Prop.
BLAIMORE, ALTA.

OUR BAR IS STOCKED WITH THE FINEST WINES LIQUORS AND CIGARS

Good Rooms. Good Meals. Rates, \$2.00 per day and up

DRY GOODS, BOOTS and SHOES, HATS and CAPS, MEN'S SUITS, BOYS' SUITS, LADIES' WEAR.

In fact, everything that can be bought in a large and up-to-date Dry Goods Store can be gotten here.

We solicit your patronage and guarantee perfect satisfaction.

THE PINK KIMONO.

A Blunder That Was Happily Righted.

By IZOLA FORRESTER.

It lay on the massive settee in the hall, an innocent looking parcel, flat and somewhat square. Three of Warwick's letters lay on top of it, neatly, as the hall boy had placed them; also his weekly paper from home.

Warwick glanced at the letters, again at the clock, tossed off his hat, coat and gloves and carried the whole lot, parcel, letters and paper, into the comfortable study and dropped into a deep chair.

There was an hour before the crowd would arrive. Everything was ready. The spread would be sent up at 8:30 sharp. He examined the letters, and then got to get away. He liked Stanton. The boy needed a good friendly grip just now. He knew himself that it was to be in New York some time. Money could not give one the password that admitted one to the inside of the "getting next to the inside of all" as Stanton said. And if the right path did not open and one happened to be lonely there were others well and welcoming. Warwick knew. The boy was young and clever. The only thing that allied him was too much money and the confidence he had therein. He was a bit handily with it all—the white and the silver and the chance for big success. Warwick had kept an eye on him for weeks, measuring and judging him, and now he was satisfied. All was going in the direction and a cool hand checking him now and then, and he would win out.

Warwick opened the weekly paper from home and smiled to himself at the familiar heading, the Weekly Visitor. Ever since he could remember the Weekly Visitor had visited regularly at the quiet, big gray house that crowned Warwick's hill, up in Hillsboro, N. H. And Stanton was from the country, too, some place out west, out in Nebraska. He wondered if he had a weekly paper, too, to keep him in touch with the old world and its ethics and standards of something besides New York.

The letters were unimportant. He took up the parcel and unlocked it. "Laundry probably," he had not ordered anything.

The paper felt to the floor, and he sat staring at the thing in his hand. There was a pink, delicate, shimmering silken thing. He stood up and shook it out to its full length. It reached to the floor. It was a fairly long one. It could not possibly be a smoking jacket. It was a woman's garment, unmistakably.

The texture was the softest Japanese crepe, the silk interwoven around the sleeves and neck in a border of golden butterflies. There was no mark on it nor on the paper. Warwick looked carefully.

The doorbell buzzed temptingly. "Come in," called a long voice. "Billy Tralor's ring. Warwick hesitated, cast the pink silk thing behind him on the chair and opened the door. Billy stepped in, looking at the pink silk thing. He looked at the room and smiled the pink silk thing.

"Here," he said reproachfully. "Way, Way."

"It was left here by mistake," said Warwick hastily. "The hall boy did it. What is it?"

Billy lifted it by the shoulders and beamed with the appreciative eye of a connoisseur.

"It's a kimono, the real imported article. No bargain sale. Who's the lucky lady?"

The doorbell buzzed again. Warwick took the kimono to the wardrobe in his dressing room and concealed it there.

"It's Stanton," Billy announced, "and the rest."

Warwick played the host with more tender discretion than ever before in his life. It was not the mere fact of the mistake that troubled him nor that he minded the boys knowing of it, but he didn't want to see that parcel (what had Billy called it?) in Stanton's hands and laughed about and speculated over. Somewhere there must be the girl who wanted the kimono. He hoped she was a brunette. Pink was best for brunettes. Not too much of a brunette, perhaps with blue eyes or gray—yes, gray—yes, gray. He had a faint idea of the girl. He had a faint idea of the girl. He had a faint idea of the girl.

"Here, don't you own a decent tablecloth, you beggar?" called Yates. Warwick smiled without replying.

Through the haze he saw the brunette girl with the pink kimono about her smiling deliciously like a goddess. He didn't want her eyes a goddess smiling, well, just as a girl should smile when she had the right one to smile at.

Stanton left the piano and came over.

"Here, you're a prince to get me here tonight," he said. "I didn't know you had a place like this. Beats home, doesn't it? What do you call it?"

"Studio apartment," said Warwick lazily. "Half den, half home, not connected with anything like a house. It's a studio and a home. It's always sticky to him a bit. There's a Jan comes in and cleans up for me, and if I want a meal I can have it."

"I am going to keepkeeping you," began Stanton wistfully.

"Honey-moon?" Warwick's eyes lightened with amusement. He had not dreamed the boy would come to him. "No, not as bad as that," Stanton hesitated, glancing at the jewels, riotous crowd about the piano. It's my sister. Stanton's sister here to take care of me until she can come herself. I guess they didn't get very good accounts of their little bit in Manhattan. But I don't come and told you about you and what sort of a chap you were and how you had taken me under your wing, and I promised to cut out the hotel and—well, a whole lot of things mother didn't like the flavor of, and today—"

"Whoopie!" yelled Yates from the dressing room. "I've found Warwick's tobacco!"

Warwick sat up and dropped his cigarette. Waiting dizzily, radiantly, wickedly out from the dressing room came Yates, arrayed in the pink silk kimono. There was a silence, then a long drawn bow of delight from the crowd.

Warwick sat up on the center table. He handed him a Mexican fan of dried plumage and a Samson fished hat. "Tralor!" he cried, crashed into the "San Toy" overture. And suddenly Warwick stood up, white and mad, mad as a cat, through that they should be in the crowd, anything that belonged to the dear, unknown girl, the brunette with the gray eyes, he said.

"Take that off!" he said. The music stopped short, but not from his words. Every face in the crowd was turned toward the door of the hall, and the brilliant light came. Warwick turned, too, and held his breath. She stood in the doorway, one hand holding the heavy drapery. Behind her was George, the colored hall boy. Her face looked startled, and yet there was amusement, too, in the wide gray eyes, as they glanced from face to face and finally rested on Yates.

"There is some mistake, I think," she said gently. "George tells me a parcel of mine was left here tonight. I have only moved here today, and he made a mistake. I think that quickly, as my blouse and apologetic. Yates was assisted from the table and directed to the pink silk kimono. "I am sorry to spoil your amusement," he said, and turned his head toward Warwick as the host, when all at once her eyes met Stanton's.

"Marjorie!" he gasped. "Marjorie, you blessed kid!"

Silently and discreetly the crowd asserted its composite face while Stanton bowed to the girl. "Marjorie!" Warwick looked unhappy.

"Boys," cried Stanton, "come on to my sister, all the way from Nebraska to Manhattan to take care of her little brother."

"Mother is here, too," Marjorie explained, blushing at the effusive welcome. "She is here, too," Marjorie explained, blushing at the effusive welcome.

"That's Warwick," interposed Stanton. "He's a fellow fellow."

Warwick bowed. Suddenly he felt a great, supreme gladness steal over him. She had gray eyes, Stanton's sister from Nebraska.

"No we came right here from the depot, and mother wanted to surprise you by having everything ready. I was a little late, but she was here, because our trunk hasn't come yet, and the boy made a mistake delivering it. We have the apartment just across the hall."

"Boys," cried Stanton, "come on to the apartment across the hall and be introduced. You've got to make us welcome because we're the new day."

Decorously and quietly the crowd crossed to the apartment next door. With dignity and beautiful grace they were introduced to Stanton and Stanton's home, and Stanton knew he was accepted and admitted forever to the "house of things."

But Warwick sat in a corner watching Marjorie make tea, tea from his teapot, which the Jap servant had brought over, and over the back of her chair hung the pink silk kimono. He was wondering how she would look in it.

"Sugar?" she asked. "One or two, Marjorie?"

"Two," said Warwick with a half suppressed sigh. "Say, do you know what a beautiful girl you are?"

"Why?" Marjorie's head bent lower over the teapot. Tea making does not become a girl with gray eyes.

"Because," said Warwick, "pink is so becoming to that type."

"And to Mr. Yates' type, too," Marjorie said. "Pink is a very good color for you, too. It's a very good color for you, too. It's a very good color for you, too."

Warwick smiled without replying. Through the haze he saw the brunette girl with the pink kimono about her smiling deliciously like a goddess. He didn't want her eyes a goddess smiling, well, just as a girl should smile when she had the right one to smile at.

Stanton left the piano and came over.

"Here, you're a prince to get me here tonight," he said. "I didn't know you had a place like this. Beats home, doesn't it? What do you call it?"

"Studio apartment," said Warwick lazily. "Half den, half home, not connected with anything like a house. It's a studio and a home. It's always sticky to him a bit. There's a Jan comes in and cleans up for me, and if I want a meal I can have it."

"I am going to keepkeeping you," began Stanton wistfully.

"Honey-moon?" Warwick's eyes lightened with amusement. He had not dreamed the boy would come to him. SPECIFIC HEAT EXPLAINED.

Capacity For Heat Varies in the Different Metals.

The specific heat of a body is sometimes spoken of as capacity for heat, and here, be it remembered, that the unit of heat is such a quantity as will raise the temperature of one pound of pure distilled water from 32 to 40 degrees F. This is one British thermal unit, or one B. T. U.

The conception of heat is entirely different from that of temperature, as is often shown in a simple laboratory experiment. A cake of ice, however small, placed in a liquid, is placed in a horizontal position, a short distance above the top of a beaker. A number of metal balls are immersed in a liquid having, say, a high temperature. All the balls soon have the same temperature as the liquid, and each of the balls is at the same temperature as all the others.

If these balls with equal temperatures be placed on the cake of wax and sink into the cake as they melt with their heat, but the rate and depth of penetration into the cake will vary, and the balls will sink to different depths.

Of all bodies, water has the greatest specific heat, and consequently it takes a greater number of thermal units to raise its temperature through a given number of degrees. Water heats comparatively slowly and cools comparatively slowly. Mercury and platinum heat rapidly and cool rapidly.

Of all bodies, water has the greatest specific heat, and consequently it takes a greater number of thermal units to raise its temperature through a given number of degrees. Water heats comparatively slowly and cools comparatively slowly. Mercury and platinum heat rapidly and cool rapidly.

A WONDERFUL RAILROAD.

The Bergen-Christiansia Line Largely Tunnels and Bridges.

One of the most interesting railway enterprises completed in Europe within the last years is the line that has been recently opened across the Rensselaer, or the purpose of providing direct communication between the city of Bergen, on the Atlantic seaboard, and Christiansia, the capital of Norway.

The line great natural difficulties had to be and were successfully overcome. The main difficulty was to find an easy passage through the mountains of the Dovrefjell range. The district in question is the most mountainous in Norway, with short, narrow valleys, from which the mountains rise abruptly, if not perpendicularly, to great heights. The fjords penetrate far into the country, and nearly all the valleys following the nature of the country, the railways are traversed by falling streams.

Altogether there are no less than 184 tunnels of the line, representing a total of about twenty-four miles. The line crosses fourteen bridges, the construction of which entailed the excavation of nearly 500,000 cubic feet of earth and 250,000 cubic feet of rock on the high mountain section, while the consumption of dynamite ran to 1,800,000 pounds.

There are fifty-five stations between the two terminal points. Of the fourteen bridges, three are in masonry, one having a span of 150 feet and another being 500 feet in length, with eight seventy-foot spans. Owing to the exposed nature of the line in the upper sections above the timber line extensive fencing was necessary beside the track, these screens being almost continuous for sixty miles between Mjølstad and Gjøvik. The line passes through a wider stretch of country than any other European railway. The winter lasts nine months and sometimes long snowfalls, with a tremendous downpour. The line cost about \$15,000,000 to build, and the difficulties of construction are only equalled by those experienced in keeping it open for traffic.

Three American rotary plows are used in winter, and in summer one is used for the heavy snow. The line, however, has reduced the amount of freight traffic to four hours, and it is an important highway for traffic—Engineering Magazine.

Marking Criminals With Wax. A French physician proposes a substitution of wax for the use of ink in marking criminals. The wax, which is applied to the face, is not so easily rubbed off as ink, and it will form a permanent mark which cannot be removed by washing or by the use of soap.
